

Rewarding Role in Cotton Industry

Cotton Australia Regional Manager – Darling Downs (Part-time or contract, flexible hours) Two to Four Days per week

Cotton Australia is the cotton industry's peak grower body. It works to represent growers, maximise industry sustainability and performance and enhance perceptions in the community.

A position is available within the team for a motivated and energetic team player to service the cotton growers across the Darling Downs.

The role involves:

- Supporting growers in the implementation of the industry's voluntary environmental program (myBMP).
- Introducing growers to Cotton Australia (and other industry bodies), and outlining the work they do on behalf of the cotton industry;
- Working with the Darling Downs Cotton Grower Associations and water user groups to collect feedback on grower priorities as well as communicating Cotton Australia's activities back to growers.
- Representing the industry to a range of regional stakeholders including community and natural resource management groups and local government;
- Organising industry events and workshops.

The position will work closely with members of the cotton industry's extension team - CottonInfo.

The successful applicant will ideally have tertiary qualifications in Agricultural or Environmental Science or a related field and some experience, dealing with farmers. Previous experience within the cotton industry would be favourably looked upon, as would a familiarity across the Darling Downs.

The position is nominally two days per week, with flexible work hours, and an opportunity to do additional hours when focused directly on assisting growers to implement myBMP.

For a full job description, please contact Rob Crothers 0408 646111 or robc@cotton.org.au .

Applications must consist of a letter of no more than two pages, outlining why you would be an ideal candidate for the position and an up-to-date resume, and forwarded to: jobs@cotton.org.au. Applications close COB – Monday, October 18, 2021.
